

# VIVEXOTIC REPTIVIEW

MADE IN THE UK

PT4138  
PT4139

**Important - Please read these instructions fully before starting assembly**

If you need help, or have damaged or missing parts, please call **0141 945 2888** and ask for the QC department. However, please note if your product has been subject to obvious carrier damage to the carton during transit to your home, we recommend that you contact your supplier.

## FITTINGS

Please note this fittings pack is used in different products, therefore it may include extra fittings that are not required in this product.

## PREPARATION

A standard Repti-View is shown in these instructions for illustration purposes, but the Repti-View Maxi fits together in the same way.

Please visit [uk.hagen.com/vivexotic](http://uk.hagen.com/vivexotic) for more information

We recommend Exo Terra reptile accessories for use with Vivexotic products. Please refer to the 'Exo Terra Essential Care & Equipment Guide' included with this product for further details.

### PROTECTING YOUR VIVARIUM - SILICON SEALING

Wooden vivariums are not recommended for pets that require tropical environments. It is advised that once built, you seal all joints and exposed fittings with aquarium silicon sealant, and leave overnight to cure. This sealing will prolong the life of your vivarium and proactively safeguard against accidental water spills and pet wastes. If your pet requires misting, it is essential that no excess water is left pooling within the vivarium. If water is allowed to seep into exposed joints, gaps or inadequately sealed edges the wood will swell.

We strongly recommend that the vivarium is sealed fully after construction, particularly where humidity levels are high. We recommend that humidity levels do not exceed 65% in any wooden vivarium and cannot guarantee the longevity of the vivarium in this case. For species requiring high levels of humidity we recommend Exo Terra Glass Terrariums. Please visit [www.exo-terra.com](http://www.exo-terra.com) for more details.

**i**

Make sure when you tighten fittings 'A' that you push the back panel '2' firmly against the plastic heatmat profile, preventing a gap.

**Warning!** The glass in the bottom panel is loose and may fall out.

**ii**

**iii**

## ASSEMBLY

**iv**

Silicon profile 'R' should be attached onto the bottom edge of the 4 x upright glass panels '5' & '6' to prevent leakage. This needs to be cut to size with scissors. **TIP:** Slide the glass into position, place the silicone along the top and cut level with the inside edge of the corner supports at each end. Alternatively, cut the strip to the measurements given below:

**Repti-View** - 347mm x 4

**Repti-View Maxi** - 460mm x 2 (front), 409mm x 2 (sides)

**v**

A heat mat (not included) can be inserted between the two pieces of glass in the bottom panel. **Do not** insert between the glass and polystyrene.

This vivarium contains EasyVents. These vents allow all of your cables to pass through the vivarium. Simply pull the vent out, pass through any plugs, and put it back in position again...Easy!

1. Take the EasyVent out of the back panel & remove caps from each channel required

2. Pass plug through the hole in the back panel

3. Insert the EasyVent back into position, locating the cables into the channels

### IMPORTANT

Do not let the lid flip back without being supported.

## 2 YEAR EXTENDED WARRANTY

You have automatically received a standard 12 month guarantee with your purchase, however will receive an extra 12 months free (giving you a total of 2 years warranty from the date of purchase), if you fill out your details online. Simply visit [uk.hagen.com](http://uk.hagen.com) and click on the 'warranty' section.

The standard and extended warranty covers for defective parts which have failed under normal use. We shall not replace parts that have been damaged by abnormal conditions or that which have been subjected to improper use. It is important that you seal your vivarium to prevent moisture entering into exposed chipboard. We will not replace parts that have been water damaged due to insufficient sealing. If not sealed correctly, this will invalidate the warranty.
